

Easy User Manual: Inventory, Sales & Accounting System

Simple Step-by-Step Guide for Non-Technical Users

Welcome! This manual is written in simple, plain language. You don't need any computer programming knowledge to use this software. Just follow this guide click-by-click.

How the Whole System Works (In Plain Words)

Think of your factory/business as a simple step-by-step chain:

[1. Supplier] —(Buy Raw Materials)—► [2. Raw Inventory]

|

(Send to Factory)

[4. Finished Goods] ◀—(Finish Batch)— [3. Work-In-Progress (WIP)]

|

(Sell to Customer)

[5. Customer] —(Collect Payment)—► [6. Accounts & Cash]

1. **Suppliers:** The companies who sell you raw materials.
2. **Raw Inventory:** The warehouse where you store raw materials (e.g. fabric, steel, plastic).
3. **WIP (Work-In-Progress):** The factory floor where materials are turned into products.
4. **Finished Goods:** The storage room for ready-to-sell complete items.
5. **Customers:** The buyers who order finished goods from you.

6. **Accounts & Cash:** Where the system tracks payments, invoices, dues, and money balance.

How to Start the App (One-Click)

Look at your main project folder. Double-click these three icon files in order:

1. **start-docker.bat**
(Wait until the window says *[SUCCESS] Containers started successfully!*)
2. **start-server.bat**
(This opens the backend engine — keep this window minimized!)
3. **start-client.bat**
(This opens the website interface!)

Now open your web browser (Chrome or Edge) and go to:

👉 <http://localhost:3000>

Demo Accounts to Log In

Role	Email	Password	What Can They Do?
Admin	admin@example.com	AdminPassword123!	Can see and do EVERYTHING
Store Keeper	storekeeper@example.com	StorePassword123!	Receives raw stock and dispatches goods
Supervisor	supervisor@example.com	SupervisorPassword123!	Controls factory production batches
Purchase Officer	purchase@example.com	PurchasePassword123!	Manages suppliers and purchase orders
Sales Officer	sales@example.com	SalesPassword123!	Manages customers, sales orders, and invoices

Role	Email	Password	What Can They Do?
Accountant	accountant@example.com	AccountPassword123!	Manages payments, dues, and financial reports

Step-by-Step Daily Workflows

Workflow 1: Buying Raw Materials from a Supplier

Step 1: Create a Supplier (If New)

1. Click **Suppliers** on the left menu under **PROCUREMENT**.
2. Click the green **+ New Supplier** button at the top right.
3. Fill in:
 - **Company Name** (e.g. *Apex Cotton Ltd*)
 - **Contact Person & Phone Number**
 - **Payment Terms** (e.g. *30 days*)
4. Click **Create Supplier**.

Step 2: Make a Purchase Order (PO)

1. Click **Purchase Orders** on the left menu.
2. Click **Create Purchase Order**.
3. Select your **Supplier**, choose **Order Date**, and pick the **Raw Materials** you want to buy along with quantity and agreed price.
4. Click **Save PO**.

Step 3: Receive the Stock in Warehouse (GRN)

1. When the truck arrives at the factory, click on the **PO Number** (e.g. *PO-2026-0001*).
 2. Click **Receive Goods (GRN)**.
 3. Type the actual quantity received and type a **Batch Number** (e.g. *BATCH-101*).
 4. Click **Confirm Goods Receipt**.
 5. **Magic!** The system automatically adds the raw materials to your inventory stock and logs the amount owed in **Accounts Payable**.
 6. **Print Document:** Click **Print / Save PDF** at the top right to print or save an official copy of the Purchase Order for your records.
-

Workflow 2: Manufacturing Products in the Factory (WIP)

1. Click **WIP Job Orders** on the left menu.
 2. Click **Create Job Order**.
 3. Choose the **Finished Product** you want to make and enter the **Target Quantity** (e.g., 500 T-Shirts).
 4. Click **Issue Raw Materials** to allocate the raw fabric/buttons from warehouse to this factory batch.
 5. When production finishes, click **Complete Job Order**:
 - Enter **Actual Yield** (e.g. 490 good units).
 - Enter **Scrap Quantity** (e.g. 10 damaged units).
 6. Click **Finalize & Close Job**.
 7. **Magic!** Raw materials are deducted from inventory, and 490 new finished items automatically appear in **Finished Goods**.
-

Workflow 3: Selling Goods to Customers & Getting Paid

Step 1: Add a Customer (If New)

1. Click **Customers** on the left menu under **SALES & DISTRIBUTION**.
2. Click **New Customer**.
3. Type Company Name (e.g. *Rahman Trading*), Phone, and set a **Credit Limit** (e.g. ₺100,000).
4. Click **Create Customer**.

Step 2: Create & Confirm a Sales Order (SO)

1. Click **Sales Orders** on the left menu.
2. Click **Create Sales Order**.
3. Choose the **Customer**, pick the **Finished Good**, set the selling **Price** and **Quantity**.
4. Click **Create SO**.
5. Open the created SO and click **Confirm Order & Reserve Stock**.
 - *Note: The system will automatically block the sale if the customer exceeds their credit limit or if you don't have enough finished goods stock!*

Step 3: Deliver Goods & Send Invoice

1. Click **Generate Invoice** inside the Sales Order page.
2. The system calculates the **15% VAT** and total amount automatically.
3. Open the Invoice detail page and click **Print / Save PDF** to print an official paper invoice to send to the customer!

Step 4: Collect Payment from Customer

1. Click **Invoices** on the left menu.
 2. Open the unpaid invoice.
 3. Click **Record Customer Payment**.
 4. Enter the amount received, choose payment method (**Bank Transfer, Cash, Mobile Banking**), and click **Confirm Payment**.
 5. **Magic!** Customer due balance goes to 0, and the money enters your Cash/Bank account.
-

Workflow 4: Checking Financials & Downloading Reports

- **Accounts Payable (AP)** (**Finance → Accounts Payable**): Shows all suppliers you currently owe money to. Click **Export Excel (CSV)** to download vendor payment schedules.
 - **Accounts Receivable (AR)** (**Finance → Accounts Receivable**): Shows all customers who currently owe you money. Click **Export Excel (CSV)** to download customer collection lists.
 - **General Ledger** (**Finance → General Ledger**): Shows every single debit and credit transaction that happened in the business.
 - **Trial Balance Report** (**Finance → Reports**): Shows the total balance sheet of your company. Click **Export Excel (CSV)** or **Print / Save PDF** to generate end-of-month audit documents.
-

? Frequently Asked Questions (FAQ)

Q: How do I export reports to Excel?

*A: On pages like **Accounts Receivable**, **Accounts Payable**, and **Financial Reports**, click the green **Export Excel (CSV)** button at the top right. A .csv file will automatically download to your computer, which opens directly in Microsoft Excel.*

Q: How do I print or save a PDF of an Invoice or Purchase Order?

*A: Open any Invoice or Purchase Order page and click the **Print / Save PDF** button at the top right. A print window will pop up where you can print to paper or select "Save as PDF".*

Q: Can I edit or delete a completed transaction if I made a mistake?

A: No. To prevent fraud, financial and stock records can never be deleted. If you made a mistake, record a correction/adjustment entry.

Q: Why does the system block me when I try to confirm a Sales Order?

A: Check two things: 1) Does your finished goods room have enough stock? 2) Has the customer crossed their assigned Credit Limit?

Q: How do I know when raw materials are running out?

*A: Check **Raw Inventory**. Items highlighted with low stock warnings have dropped below their set Reorder Level.*

Need Help?

Contact your System Administrator or check the **Audit Logs** tab to see who performed any recent action in the system.
